

Video Streaming / Sharing / Chat Apps

- With many apps there is NO moderation at all, but some will remove offensive material.
- If something offends or upsets you, Report it !!

Icon / Age	App Description
 13 	facebook: People update their profile with text, photos, video and links, as well as location. You can send a " Friend " request. This allows you both to see each other's updates. You can decline a "friend" request. 13+ Facebook Messenger is a linked but separate messaging app Facebook MessengerKids is aimed at <13s and allows some degree of parental control, but remember facebook is collecting data on your kids!
 13	Twitter: Registered users can post text updates or " tweets " limited to 140 characters of text. You can also share images, video & links. You " follow " someone else to see their tweets and they can "follow" you. 13+
 13	Instagram: Allows sharing of photos & videos (up to 15 secs). Filters can be applied to images. Text is for captions / comments only. You "follow" someone else and they can follow you. Owned by Facebook. 13+
 13	Snapchat: users can take photos, videos , add text and drawings, and send them to a list of people from their contacts. Users set a time limit for how long their "Snaps" can be seen, (1-10 secs), after which they disappear. There are other apps that CAN capture these "Snaps". 12+
 16	What'sApp: world's most popular App, allows users to share text messages, images, video, and audio media messages as well as their location using location technology. (Now owned by Facebook)
 13	You Tube: The BIG video sharing site. Users create a "channel", upload and edit videos, and set whether or not the videos are publicly viewable. Viewers may comment and subscribe to your "channel" if they like your stuff. You Tube now also does live video streaming.
 17	Periscope is a live streaming video app that allows people to live-broadcast anytime from anywhere. Integrated with Twitter.
 16	Tango is a social-networking app that includes many ways to connect and share information, including video calls, group chats, games, phone calls, and music.
	Omegle is a free online chat app that allows users to socialize with others without the need to register. The service randomly pairs users in one-on-one chat sessions where they chat anonymously. Use of video is possible.
 18	Live.me is a live streaming video app that allows people to live-broadcast anytime from anywhere.
 17	Live.ly allows users to broadcast live video to online friends and is made by the same developers as musical.ly
 16	Musical.ly is social network for sharing user-generated music videos. You can upload your own videos, remix others' work, or browse content created by other users and by more famous recording artists.
 10	Skype: provides video chat and voice calls from computers, tablets and mobile devices via the Internet to other devices / smartphones. Chats can be multi-person.
 13	Facetime: Video chat (between Apple devices only), using the forward facing camera built in to the device. You can see the person you're talking to and they can see you! It is possible to "capture" the video and save it.
 16	ooVoo: allows users to communicate through free instant messaging, voice, and group video chat. Works on most devices.
 16	Viber: Users can exchange text messages & images, and can voice and video chat.
